SUMMARY

Computer Science & Engineering undergraduate targeting the Associate Software Engineer - Intern position at Kaleris. Proficient in Object-Oriented Programming, Data Structures, Design Patterns, and RDBMS/SQL architecture. Experienced in Agile environments taking full SDLC ownership—from architecture and REST API development to Test-Driven Development and QA collaboration—delivering high-performance, fault-tolerant enterprise software.

EDUCATION

Vellore Institute of Technology, Bhopal, India

Sept 2023 – Oct 2027

B.Tech in Computer Science and Engineering (AIML) – CGPA: 8.92/10

TECHNICAL SKILLS

- **Languages & Core:** Java, C++, Python, JavaScript, TypeScript, Object-Oriented Programming (OOP), Data Structures
- **RDBMS & Persistence:** PostgreSQL, MongoDB, Supabase, Relational Schemas, SQL Queries, JDBC Concepts, Drizzle ORM
- **Web & Enterprise Stack:** RESTful APIs, Node.js, Express, React, Next.js, WebSockets, HTML5, CSS3/Tailwind, Tomcat Concepts
- **Testing & QA Methodologies:** Test-Driven Development (TDD), Unit Testing, Automated API Validation, Cross-Device QA
- **DevOps & Tools:** Git, GitHub Actions (CI/CD), Docker, Postman, Vercel, AWS (S3, EC2), Linux/Ubuntu CLI, Debugging

EXPERIENCE

Software Engineer & UI/UX Designer, Encrypta

Jun 2025 – Oct 2025

- Rebuilt 5 user profile modules with real-time form validation, cutting submission errors by 30% in internal testing.
- Conducted cross-device testing across 3 screen sizes, correcting layout breakpoints to resolve mobile UI shifts.
- Collaborated with product teams to ship full-stack features, taking modules from Figma mockups to merged production pull requests.

Web Developer Intern, Zidio Development

Feb 2025 – Mar 2025

- Developed an admin telemetry dashboard with Chart.js to visualize live task activity and eliminate manual daily reports.
- Removed render-blocking scripts across 3 high-traffic pages, lifting Lighthouse performance scores from 54 to 81.
- Automated continuous deployment pipelines using GitHub Actions, reducing release turnaround from 2 days to same-day delivery.

PROJECTS

Dukaan Smart – Intelligent Inventory Platform | [Live Project](#)

TypeScript, Node.js, Firestore, REST APIs

- Built a modular inventory management backend handling automated SKU tracking and high-concurrency order processing.
- Engineered relational database schemas with indexing on PostgreSQL, cutting search and catalog retrieval latency by 40%.
- Implemented RESTful endpoints and real-time inventory analytics workflows, guaranteeing transactional consistency across stock updates.

Convo Cortex – AI Interview Platform | [Live Project](#)

Next.js, OpenAI, PostgreSQL, Drizzle ORM

- Engineered an adaptive evaluation service using GPT-4o to generate dynamic follow-up questions from conversation context.
- Structured validated JSON response schemas, cutting post-interview competency report generation from 20 mins to under 2 mins.
- Stored interview sessions in PostgreSQL with Drizzle ORM and configured rate limiting on endpoints to control usage costs.

PUBLICATIONS

Veedushi Jain et al. “Clinical Decision Support through Machine Learning: Benchmarking LightGBM and Deep Learning Models for Diabetes Onset Prediction,” *IEEE ICAAIC 2025*. Conducted empirical benchmarking on clinical datasets, demonstrating that LightGBM outperformed neural baselines (F1: 0.79 vs 0.74) with roughly 3x faster inference efficiency.

HONORS & CERTIFICATIONS

- **Repdox National Hackathon (Bharat Pulse AI):** Awarded 1st Runner-Up for architecting a resilient, offline-first data platform.
- **Cybersecurity Analyst Certificate (IBM):** Validated knowledge of network protocols, defensive system design, and API security (Jun 2025).
- **Graph Theory Programming Camp (AlgoUniversity):** Solved 17 advanced graph problems under Codeforces Master mentorship (May 2025).

LEADERSHIP

- **Chairperson, Startup Club:** Grew active membership, directed 4 recruitment cycles, and executed showcase events.
- **Design Core, AWS Club:** Organized technical workshops on cloud architectures and telemetry, engaging 250+ participants.
