SUMMARY

Full-Stack Engineer focused on AI-powered product development and user-facing systems. Experienced in FINOVA, an AI finance tracker used by 100+ users, and Convo Cortex, an LLM-based interview platform with automated feedback generation. Published at IEEE ICAAI 2025, with hands-on work across Next.js, React, Node.js, PostgreSQL, Supabase, and AI product workflows.

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, TypeScript, Java, C++
- Frontend:** Next.js, React, Tailwind CSS, Shadcn/ui, Redux
- Backend:** Node.js, Express, REST APIs, JWT, Clerk Auth, WebSockets
- Databases:** PostgreSQL, Supabase, MongoDB, Drizzle ORM
- AI/ML:** OpenAI API, Gemini AI, LLMs, NLP, Scikit-learn, Prompt Engineering
- DevOps & Cloud:** Docker, GitHub Actions, CI/CD, Vercel, AWS (S3, EC2)
- Tools:** Git, Postman, Figma

EXPERIENCE

Software Engineer & UI/UX Designer – Encrypta Jun 2025 - Oct 2025

- Rebuilt 5 user profile modules in Angular with real-time form validation, reducing submission errors by 30% in internal testing
- Conducted cross-device testing across 3 screen sizes and corrected layout breakpoints to resolve mobile UI shifts
- Collaborated with the product team to design and ship features, taking modules from Figma mockups to merged production pull requests

Web Developer Intern – Zidio Development Feb 2025 – Mar 2025

- Removed render-blocking scripts on 3 high-traffic pages, improving Lighthouse performance scores from 54 to 81
- Developed a real-time admin dashboard with Chart.js to visualize live task activity and replace manual daily reports.
- Automated Vercel deployments using GitHub Actions, reducing release time from 2 days to same-day delivery

PROJECTS

Convo Cortex – AI Interview Platform | github.com/Veedushi2101/convo-cortex Next.js, LLMs, OpenAI, Drizzle ORM

- Engineered an adaptive interview flow where GPT-4o generates follow-up questions based on candidate responses and conversation context.
- Generated structured JSON outputs to auto-fill competency feedback reports, cutting post-interview writeup time from 20 minutes to under 2 minutes.
- Stored interview sessions and conversation history in PostgreSQL with Drizzle ORM and added rate limiting to control OpenAI usage costs

FINOVA – AI-Powered Finance Tracker | finovaai-eight.vercel.app Arcjet, Next.js, Gemini AI, Supabase

- Onboarded 100+ users in the first month using Next.js App Router, Supabase for authentication, and real-time data synchronization.
- Integrated Gemini Vision for receipt scanning so users can photograph a receipt and have the transaction parsed and categorised automatically, cutting manual entry by about 75%
- Configured Arcjet-based rate limiting on financial endpoints and automated spending alert emails through Resend

WorkQuanta – Productivity Task Manager | github.com/Veedushi2101/Work-Quanta REST APIs, React, Redux, Node.js

- Implemented a drag-and-drop kanban system with WebSocket-based real-time synchronization for 50+ active users.
- Replaced polling-based task updates with backend prioritization, cutting database query volume by 60% during peak load
- Implemented GitHub Actions CI/CD to automate linting, testing, and deployment to Vercel on every main branch merge

PUBLICATIONS

Veedushi Jain et al. "Clinical Decision Support through Machine Learning: Benchmarking LightGBM and Deep Learning Models for Diabetes Onset Prediction." IEEE ICAAI 2025. LightGBM outperformed LSTM and feedforward networks on the PIMA dataset (F1: 0.79 vs 0.74) with roughly 3x faster inference, supporting practical deployment in resource-constrained clinical settings.

EDUCATION

Vellore Institute of Technology Bhopal, India
B.Tech in Computer Science and Engineering (AIML) | CGPA: 8.86
Sept 2023 – Oct 2027

Relevant Coursework: Machine Learning, Deep Learning, Data Structures, Algorithms, Computer Vision

CERTIFICATES & ACTIVITIES

- Cybersecurity Analyst Certificate, IBM (Jun 2025)
- Graph Theory Programming Camp, AlgoUniversity – solved 17 advanced graph problems under Codeforces Master mentorship (May 2025)
- Chairperson, Startup Club – grew active membership, led 4 recruitment cycles, ran end-of-semester showcase events
- Design Core, AWS Club
